## **Advisory Action**

This Office Action is in response to Applicant's response <u>after Final</u> filed on 13 December 2007. No new claim or claim amendment is submitted.

11. Applicants' arguments with respect to rejection under 35 U.S.C 102(e) over reference Pan et. al. were fully considered, but were found unpersuasive and rejections of record are adhered to.

In response to applicant's argument that the references fail to show certain features of applicant's invention it is noted that the features upon which applicant relies (i.e., biphenyl structure) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicants' arguments with respect to rejection under 35 U.S.C 102(b) over reference Eritja et. al. were fully considered, but were found unpersuasive and rejections of record are adhered to.

Applicants argue that the recitation "optional substituted alkyl group having up to 4 carbon atoms" should be interpreted as a range of 1 to 4 carbon atoms. The phrase "up to 4 carbon atoms" is interpreted to include zero carbon atoms. See the following examples in which the phrase "up to" have been interpreted to include lower limit as zero. The term "up to" includes zero as a lower limit, *In re Mochel*, 470 F.2d 638, 176

Application/Control Number:

10/764,989

Art Unit: 1623

USPQ 194 (CCPA 1974); and "a moisture content of not more than 70% by weight" reads on dry material, *Ex parte Khusid*, 174 USPQ 59 (Bd. App. 1971). The applicant's argument that the phrase "up to 4 carbon atoms" should be interpreted as "1 to 4 carbon atoms" does not comport with the cases as cited above.

Applicants' arguments with respect to rejection under 35 U.S.C 103(a) over reference Pfleiderer et. al. were fully considered, but were found unpersuasive and rejections of record are adhered to.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy P. Issac whose telephone number is 571-272-2674. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia Anna Jiang can be reached on 571-272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
